SUMMARY

Senior Frontend Developer with 9 years of experience building scalable web applications with React, TypeScript and Next.js. Core contributor to an enterprise workforce platform with 3M+ users: Angular and React in an Nx monorepo, a shared design system, an AI writing assistant (Gemini) and Microsoft Teams integration. Delivered billing (FastSpring), real-time features (WebSockets) and high-performance animated sites (PageSpeed 92+). Comfortable in large cross-functional teams and owning projects end to end. Mentors developers and conducts technical interviews.

SKILLS

Languages & Frameworks: TypeScript, JavaScript (ES6+), React, Next.js, Angular, Node.js, HTML5, CSS3

State & Data: Redux, Redux-Saga, MobX, GraphQL, Apollo Client, REST APIs, WebSockets, Firebase, NoSQL

UI & Styling: Design Systems, Storybook, Accessibility (a11y), Tailwind CSS, SCSS, styled-components, Material UI, GSAP, SVG animation, Lexical

Testing & Tooling: Jest, React Testing Library, Playwright, Nx, Monorepos, Webpack, Gatsby, Git, CI/CD, i18n

Integrations: Gemini AI, FastSpring, Microsoft Teams, Mapbox, Google Analytics, Feature Flags, Microservices

Practices: Web Performance Optimization, Code Review, Mentoring, Technical Interviewing, Agile/Scrum

WORK EXPERIENCE

Senior Frontend Developer | Proffiz

Nov 2019 – Present

Software company building and maintaining products for international clients.

Client: WorkJam – enterprise frontline workforce platform (3M+ users)

- Built the **employee scheduling module from scratch** (FullCalendar): daily, weekly and by-position views, shift create/edit/duplicate/delete, shift swaps and open shifts, with behavior driven by user role and per-company feature flags.
- Kept schedules with **hundreds of shifts** fast through employee pagination, memoized shift cells and GraphQL/REST response caching.
- Owned the frontend of an **AI writing assistant (Gemini)** in the shared Lexical rich text editor: streamed responses, format-preserving insertion, predefined actions and custom prompts.
- **Co-led the migration of feature flags from three systems to one** with zero downtime, running old and new side by side with a staged rollout.
- Co-maintained the **shared design system**: accessible atomic components documented in Storybook and used across every app on the platform.
- Shipped features in **Angular and React** within a large Nx monorepo and migrated existing Angular features to the React infrastructure; contributed to the **Microsoft Teams** integration.
- Connected the standalone chat app to the iOS/Android apps via a **WebView bridge**: resilient WebSocket reconnection, auth sync and native media upload events.
- Set up **i18n** in the new React app and contributed to an AI workflow that translates new keys into **50+ languages** and opens the pull request automatically.
- Covered features with unit tests (Jest, React Testing Library) and instrumented them with Google Analytics events to track real usage.

Client: Esko – pre-production software for the packaging and printing industry

- Integrated **FastSpring billing end to end** in a user-management portal: subscriptions, plan changes, payments and role-based access control; fully documented the integration.
- Kept the frontend in sync with multiple **microservices** as subscriptions and access rights changed.
- **Introduced TypeScript and unit testing** (Jest, React Testing Library) into the codebase; built new features and wrote technical documentation.

Clients: real-estate developers – design-led marketing sites

- Delivered **8-10 animated websites end to end**, from architecture to launch and post-launch support, using React, Gatsby, GSAP, fullPage.js and interactive SVG animation.
- Achieved **PageSpeed Insights scores of 92+** by optimizing images, animations and video, and building static pages with Gatsby.
- Integrated Firebase, Mapbox, third-party services and custom HTML email templates.

Team

- Mentored developers and took part in technical interviews for new hires.

Frontend Developer | Benamix

Jul 2018 – Sep 2019

- Built payment flows, a bounty program and real-time charts over **WebSockets** for a crypto finance platform.
- Developed a corporate site with custom animations, plus e-commerce shops and landing pages with complex layouts.

Frontend Developer (React) | Sol-Ra (Remote)

Sep 2017 – Jun 2018

- Built an internal CRM with data tables and analytics dashboards using React and Redux.

Junior Frontend Developer | M-Pluse

Jul 2017 – Sep 2017

- Built e-commerce and interactive, design-focused client sites with Angular.

EDUCATION

Master's and Bachelor's in Applied Mathematics and Computer Science

2015 – 2021

Ivan Franko University
