MY SKILLS

- HTML5/CSS3, SCSS, styled-components, Material-UI, TailwindCSS
- TypeScript
- GraphQL Apollo Client
- React
- Redux, Redux-Thunk, Redux-Saga
- Unit testing, Jest/React testing library
- GSAP
- Webpack, Gulp, Gatsby.js
- Next.js

Have experience with

- Angular
- Node.js

LANGUAGE SKILLS

English 80%

Ukrainian 100%

WORK EXPERIENCE

PRESENT
NOV 2019

SENIOR FRONT-END DEVELOPER
PROFFIZ

Project 1.

A large-scale SaaS platform for enterprise workforce management, built as a modular monorepo across web, iOS, and Android.

Main challenges and accomplishments: Developed and maintained different complex features across a microservice-based frontend architecture.

Integrated AI-powered functionality into the platform. Ensured cross-platform compatibility for WebView-embedded experiences in native iOS and Android applications. Worked with a hybrid GraphQL/REST data layer and maintained a shared atomic design system consumed across all modules.

Technologies: TypeScript, React, Next.js, GraphQL, REST API, TailwindCSS, Lexical, Jest, Storybook, i18n

Project 2.

Development of short-term, design-focused web projects with emphasis on interactivity and visual quality. Independently handled full project lifecycle from inception to release and post-launch support. Implemented complex animations and visual effects, integrated third-party platforms and services, and delivered optimized, production-ready solutions.

Main challenges or accomplishments: End-to-end ownership of projects - architecture decisions, development, and ongoing maintenance

Technologies: HTML, CSS, TypeScript, React, Gatsby, GraphQL, Styled-Components, GSAP, Mapbox, Firebase, GitHub

Project 3.

Development of a platform for pre-production solutions in the packaging and printing industry. Contributed to architectural improvements, introduced TypeScript and unit testing practices, built new product features, and authored technical documentation.

Main challenges or accomplishments: Deep integration of an external billing provider with complex subscription flows and role-based access into a microservice architecture.

Technologies: HTML, CSS, TypeScript, React, Material-UI, Bootstrap, Jest, React Testing Library, Perforce

SEP 2019
JUL 2018

FRONT-END DEVELOPER BENAMIX

Building Web Apps, building features, animations, coding complex layouts.

Few example of projects:

- Financial platform that worked with crypto. Payment system, Bounty system, working with algorithms etc.
- Corporate site with individual design and animations(priority on interactivity and optimization)
- Small shops, landings, etc.

Technologies: HTML, CSS, Javascript, SCSS, React, Redux, Matherial-UI

JUN 2018
SEP 2017

FRONT-END DEVELOPER(REACT), REMOTE SOL-RA

Built an internal CRM system for company employees, including data tables, analytics dashboards

Technologies: HTML, CSS, Javascript, SCSS, React, Redux, Matherial-UI

SEP 2017
JUL 2017

JUNIOR FRONT-END DEVELOPER M-PLUSE

Developed various client-facing web projects ranging from e-commerce to interactive design-focused sites

Technologies: HTML, CSS, Javascript, SCSS, Angular 2
